CCI Launches Second High-Capacity Network in San Antonio, Texas

SAN ANTONIO, TX--(Marketwired - Feb 25, 2014) - Competitive Companies, Inc. "CCI" (OTCQB: [CCOP](#)) (OTCBB: [CCOP](#)), through its wholly owned subsidiary, Capaciti Networks, Inc., today announced the launch of its second high-capacity wireless network in San Antonio, Texas.

"The San Antonio wireless network launch is part of CCI's 2014 30 city roll out plan to deliver gigabyte Internet services to businesses and enterprise solutions," said William Gray, President/CEO of CCI. "Capaciti will be using the same millimeter wave and wireless technology in San Antonio that it operates in Columbus, Ohio and which helped Columbus be named to the Top 7 most intelligent cities in the world for two consecutive years."

The Capaciti network in Columbus is currently delivering record-breaking mobile download speeds of more than 125 Mbps to a smartphone and 200 Mbps for a laptop.

"Internet download speeds play a major part in what services you can provide on the Internet and high-capacity mobile networks are critical for enabling Intelligent city communications services such as first responders, carrier offload, smart metering and preparing cities to be more competitive in a global economy," states Angus Davis, Chief Strategy Officer for Capaciti Networks.

CCI's gigabyte network has also been designed to support "small cell networks," which are multiple wireless transmitters closely located to each other creating substantially increased download speeds to a large number of mobile subscribers. According to JDSU, a major research firm, 98% of carriers intend to utilize small cell sites to expand their mobile broadband services.

Wytec International, Inc., another CCI subsidiary and an owner of seven key foundational patents dealing in multi-channeling technology, has expanded its intellectual property for supporting small cell networks to be mounted on utility poles. Wytec will debut its small cell technology at the San Antonio Competitive Carriers Association (CCA) Global EXPO at the Grand Hyatt Convention Facilities on March 25th of 2014.

About Competitive Companies, Inc.

Competitive Companies, Inc. is a Nevada-based corporation with offices in San Antonio, Texas and Eau Claire, Wisconsin. The company began operations in 1998 to provide telecommunication services, including data, voice and video to multiple dwelling units in tier-one and tier-two markets. Market conditions and the acquisition of Wytec International, Inc. along with the development of its FCC Registered Link Program offered through its subsidiary operation, Wylink, Inc. has dramatically expanded CCI's business model in supporting next

generation 3G/4G mobile and fixed wireless broadband services. Wytec/Wylink has already had a significant impact on CCI's broadband services and revenue potential as it initiates its "Intelligent Community" development operations both nationally and internationally.
