Dec 03, 2014 (ACCESSWIRE via COMTEX) -- SAN ANTONIO, TX / ACCESSWIRE / December 3, 2014 / Wytec International, Inc., subsidiary of Competitive Companies Inc. (CCI), (otcqb:CCOP) announced today it has now activated multiple 70-80 GHz millimeter links in Denver, Colorado in preparation for the build out of its proprietary Diamond Ring backhaul. Wytec utilizes the quasi-licensed spectrum as its frequency of choice for transporting wireless broadband services to municipal, commercial and enterprise services. "We are very pleased to add Denver, Colorado to our list of 30 U.S. markets to be activated by end of 2015. To date we have registered 37 millimeter wave links in 3 U.S. markets", says William Gray- CEO of Wytec.

Wytec markets and develops its Registered Link Diamond Ring program through its wholly owned subsidiary, Wylink, Inc. The highly successful "redundant" ring now delivers gigabit broadband services to municipal, commercial and enterprise customers. Wytec will also utilize the carrier grade ring to support its patent pending LPN-16 Small Cell deployment to be constructed in multiple markets by year-end 2015. Small Cells have been touted by mobile industry analyst as the most likely technology solution to the growing mobile broadband demand. The growing data demand generated by Smartphones and smart devices have created enormous demand on today's carrier networks causing an increase in drop calls and slower broadband speeds.

Wytec's patent pending LPN-16 Small Cell solution is ideally positioned to take advantage of this enormous market demand estimated to exceed \$352 Billion in mobile data service revenue by 2020. "We are exceptionally excited about the deployment of the LPN-16 technology as it represents an aggressive move for Wytec to become one of the largest and fastest Small Cell networks in North America," states Bob Merola, Wytec's CTO.

As forecasted by Signals and Systems Research, Small Cells and carrier Wi-Fi deployment are expected to carry more than 60% of all mobile data traffic by 2020. For more information about CCI-Wytec carrier offload plans, go to www.cci-us.com.

About Competitive Companies, Inc.:

Competitive Companies, Inc., founded in 1998, is a Nevada-based corporation with corporate offices in San Antonio, Texas. The Company primary business focus is acquiring and providing next generation fixed and mobile wireless broadband technologies through its subsidiaries Wytec International, Inc. and Capaciti Networks Inc. Most recently, Wytec has filed a provisional patent for its unique Small Cell Node called the LPN-16 and is scheduled to pilot test the technology in three cities by the end of 2014. Test will include a host of service providers including carriers, Cable operators and Fiber to the Home (FTTH) service providers.

Forward-Looking Statements:

This press release contains statements that are "forward-looking" and are made pursuant to the Safe Harbor provisions of the Private Securities Litigation Reform Act of 1995 and federal securities laws. Generally, the words "expect," "intend,"

"estimate," "will" and similar expressions identify forward-looking statements. Since forward-looking statements address future conditions, they involve inherent risks and uncertainties. Actual results in each case could differ materially from those currently anticipated in such statements.
